

## AudioCodes Media Gateways for Avaya Solutions

Featuring AudioCodes MediaPack™ & Mediant™ Media Gateways integrated into Avaya's Communication Manager with Survivable SIP Gateways - "Thin Branch" Solutions

### Communication Manager with Survivable SIP Gateways: A solution addressing requirements for remote enterprise

### Communication Manager with Survivable SIP Gateways - Thin Branch Solution

By utilizing AudioCodes gateways, the "Communication Manager with Survivable SIP Gateways Solution" enables Avaya 96xx SIP phone users at remote branch offices to have maximum reliability in case of WAN failures. The Avaya 96xx SIP phones register with the AudioCodes gateway SAS (Stand Alone Survivability) user agent. During a WAN failover, the AudioCodes gateway with SAS will provide the following basic telephony services to the Avaya 96xx SIP phone users:

- Make and receive calls
- Intra-branch calls
- Features: Hold, Transfer and Conference

During failover periods, the AudioCodes gateway will continue to ping the Avaya Communications Manager (CM) with a keep-alive link. Once the WAN is restored and the Avaya CM responds and re-establishes communications with SIP phones, the AudioCodes gateway returns to normal functionality. The AudioCodes gateway will continue to monitor the WAN for disruption of service to its Avaya 96xx SIP phone users. AudioCodes MediaPack™ 11x supports up to 10 SIP phone users and up to 100 SIP phone users are supported by AudioCodes Mediant™ 1000 and Mediant™ 600.

For "Communication Manager with Survivable SIP Gateways Solution" and other Avaya customer application requirements, AudioCodes gateways are available worldwide from AudioCodes' distribution channels.

## DevConnect Certified Solution Summary

AudioCodes is a Platinum member of the Avaya Developer Connection (DevConnect) Partner Program. The MediaPack 11x, MediaPack 124 and Mediant 1000 Gateways are DevConnect certified and compliant with Avaya's Communication Manager and SIP.

MediaPack™ Gateways

Media Gateway for FXO/FXS Connectivity  
(Up to 24 channels) to CM/SES

Mediant™ 600

Media Gateway for Mixed FXS/BRI Connectivity  
to CM/SES

Mediant™ 1000

Media Gateway for Mixed FXO/FXS/BRI/E1/T1  
Connectivity (Up to 120 channels) to CM/SES

## AudioCodes Advantages for VARs

### Technical Advantages

- "Communication Manager with Survivable SIP Gateways Solution" supported by AudioCodes' Stand Alone Survivability (SAS)
- Analog FXS and FXO support
- 100% SIP compliance and certified with Avaya CM and SES
- Scaling options for meeting all Remote Branch Office requirements
- Industry's best Voice Quality
- Uniform core architecture, software and management facilities for ease of support and training
- Product Stability
- AudioCodes Support

### Business Advantages

- Strong partner relationship
- AudioCodes' Gateways complement the Avaya Communication Manager with scaling options to meet customer remote branch office sizing requirements
- Compelling price / performance of the AudioCodes MediaPack 11x and Mediant 1000 Gateways with Survivable Intelligent Edge offers a cost-effective platform for Avaya 96xx SIP IP phone series survivability
- Leverage current investments in legacy telephony equipment
- IP connectivity for geographically dispersed organizations
- Global distribution and support

## How to Purchase

AudioCodes equipment can be purchased from the AudioCodes' global distribution network. To locate a certified AudioCodes distributor in your location, please visit AudioCodes' "Channel Partner Locator" on the AudioCodes website at: [www.audiocodes.com](http://www.audiocodes.com)

As part of the Communication Manager with Survivable SIP Gateways solution, the MediaPack 11x gateways will be available from Avaya for direct Avaya accounts in North America Region and for both direct and indirect Avaya accounts in other parts of the world. For additional information, contact:
