

AudioCodes Service Provider SBCs

Scalability. Performance. Protection.

AudioCodes offers service providers a line of service provider core Session Border Controllers (SBCs) that facilitate scalable, secure and high-quality SIP trunking and hosted PBX service delivery.

AudioCodes service provider SBCs provide the interoperability, security and quality assurance that service providers need to connect to their enterprise and residential customers.

Built for today's service provider cloud-based data centers, our service provider SBCs are available in both virtualized and dedicated server forms.
