

In recent years, communications technology has revolutionized the way banks and financial institutions engage with their customers. Today's customers expect to use their mobile phones and the internet to access their accounts and make transactions. To avoid being left behind, banks need to embrace these new technologies and create a more customer-friendly environment.

Microsoft Teams and Skype for Business unified communications and collaboration solutions enable financial institutions to communicate internally and engage effectively with customers anywhere, at any time and on any device. AudioCodes One Voice portfolio of products and solutions provides essential voice infrastructure elements that enable reliable and cost-effective migration of existing telephony systems to Microsoft Teams and Skype for Business while ensuring rapid user adoption and reliable connectivity with external networks and legacy platforms.

AudioCodes Benefits for Financial Services

Reduce communications costs and complexity

Full voice enablement for on-premises and cloud Microsoft UC environments
Seamless connectivity with cost-effective SIP trunks

Cost-effective migration from existing solutions

Certified SBCs enable controlled migration from legacy systems
Seamless integration of analog devices eliminates need to replace legacy phones and faxes

Increase staff productivity

Certified IP phones offer a familiar calling experience with full Microsoft Teams and Skype for Business integration

Improve customer experience

Advanced, flexible voice dialing technology simplifies phone access to banking services
High quality web calling provides additional opportunities for customer engagement

Data security and compliance

Robust voice security protects against fraud and malicious attacks
Secure compliance recording of any call or instant messaging session
