Product Notice #0323

Software Fix Release for AudioCodes SBCs & Gateways Ver. 7.20A.156.009

We are pleased to announce the release of Software Version 7.20A.156.009, a software fix for our Session Border Controllers (SBCs) and Media Gateways.

This update includes resolved constraints as well as some new exciting features. For a full description of this software version, click here to download the Release Notes from AudioCodes Website.

Main Features

- Unique local SIP UDP port assignment per registered user
- Handling multiple Address of Records (AORs) with same Contact user
- Sending SIP messages to AudioCodes OVOC for SIP call flow diagrams
- Syntax enhancement for Dial Plan Tags using the dot (.) symbol
- DHCP Option 160 for Automatic Provisioning
- ENUM queries for Call Setup Rules, allowing the device to route calls, initially destined to an E.164 telephone number, to a SIP URI address
- SIP Message Conditions for starting and stopping SIPRec sessions
- SIP Classification by IP address and SIP Contact header
