VocaNOM
Instant Voice-driven Internal Communication Assistant

Easy & immediate access to voice dialing and full company contact details

More than 90% accuracy in contact name recognition & call transfer rates

Up to 80% improvement in searching, dialing times and employee productivity

VocaNOM is an intuitive communication solution, allowing enterprises to communicate in the most effective, simplified way. VocaNOM enables employees to interact with one another from within the office, outside of it, and even on the go - using their voice alone.

Why VocaNOM?

- Easy & automatic full contact details synchronization using Active Directory or CSV
- Quick and simple cloud-based or on-premise deployment
- Web Management Interface allows friendly solution management, configuration and analytics
- VocaNOM Mobile App (iOS & Android) allows easy access to organizational contacts from everywhere at anytime
- Built-in voice dialing integration in AudioCodes IP phones
