Release of One Voice Operations Center (OVOC) Version 7.6.1116 for General Availability

We are pleased to announce the release of OVOC Software Version 7.6 (7.6.1116) for General Availability (GA)!

This release includes many new exciting features as well as resolved constraints from previous releases. For a full description of this release, click here to download the *One Voice Operations Center Release Notes* from AudioCodes website.

The software for this release is available for download from AudioCodes' Services Portal at https://services.audiocodes.com (registered customers only).

Major Features

- Introduction of the new Dashboard as an OVOC entry page
- Enhanced Performance Monitoring of AudioCodes devices
- Exporting of up to one million calls using the OVOC UI
- Support for SmartTAP Call Recording in OVOC
- OVOC SSL support for FQDN Authentication
- OVOC LDAP support in Multi-Tenant environment
- Device Manager support for Jabra and Polycom VVX devices
- Implementation of the new OVOC Agent for Device Management

Bare metal installations or upgrade software and virtual image for VMWare and Hyper-V clean installations, are available for download from the Services Portal at https://services.audiocodes.com.

For Amazon deployments, a list of AMI IDs per region is available at the service portal as well: https://services.audiocodes.com.
