Product Notice #0373

Release of AudioCodes Routing Manager (ARM) Version 8.8 for General Availability

We are pleased to announce the release of ARM Software Version 8.8 (8.8.21) for General Availability (GA)!

This release includes many new exciting features as well as resolved constraints from previous releases. For a full description of the release, click here to download the *AudioCodes Routing Manager Release Notes* from AudioCodes' website.

The software for this release is available for download from AudioCodes' Services Portal (registered customers only).

Key Features

- This version is available on Microsoft Azure Marketplace.
- Support for Distributed Registered Users at Network Level.
- Grouping of ARM resources of same type (Nodes, Peer Connections or VoIP Peers) and ability to use a Resource Group as an action in Routing Rules.
- ARM Machine OS upgraded with latest CentOS 6.10 security patches.
- Security-based routing through integration with SecureLogix's Orchestra One.
- ARM Release Notes extended with capacity specification and list of major fixes.

Affected Products

AudioCodes Routing Manager

NEW! ARM Demo License Activation

ARM Customers can activate the ARM Demo license using the link at https://www.audiocodes.com/arm-demo-license-activation. This license fully covers the entire ARM functionality and provides support for up to 100 concurrent sessions, 100 routing rules and 500 users. The Demo license is valid for a period of 3 months.

Note that migration from ARM Demo to Full Production license retains all the Customer's settings (e.g., rules).
