

ONE VOICE FOR MICROSOFT 365

COMPREHENSIVE VOICE SOLUTION FOR MICROSOFT TEAMS AND SKYPE FOR BUSINESS

AudioCodes One Voice for Microsoft 365 is a unified solutions, products and services offering designed to simplify and accelerate voice-enablement of Microsoft Teams and Skype for Business implementations.

AudioCodes One Voice for Microsoft 365 includes AudioCodes’ Microsoft-qualified end-to-end voice elements, wide-ranging services, and extensive expertise to enhance Microsoft Teams and Skype for Business voice implementations. These products and services are suitable for all Microsoft-approved unified communications architectures, including on-premises, cloud-based and hybrid.

AudioCodes One Voice products and solutions are available on a monthly subscription basis via the AudioCodes Live managed service offerings.

AUDIOCODES ONE VOICE FOR MICROSOFT 365

SUITABLE FOR ANY MICROSOFT TEAMS OR SKYPE FOR BUSINESS DEPLOYMENT SCENARIO

AUDIOCODES LIVE

AudioCodes Live is a portfolio of professional services designed to make AudioCodes' voice expertise, products and solutions available to partners and customers via a flexible, subscription-based, managed service model.

AudioCodes Live for Microsoft Teams is a portfolio of managed services, delivered to our business customers by AudioCodes (or via business partners).

AudioCodes Live Cloud for Microsoft Teams is a platform-as-a-service offering, delivered by AudioCodes, that enables service providers to offer Direct Routing voice connectivity and employee life-cycle management (MACD) to their business customers

- Flexible managed service options
- Per-user-per-month subscription pricing
- Include Direct Routing connectivity, telephony integration, user & device management
- Optional extras include IP phones, meeting room devices, compliance recording

MICROSOFT TEAMS

Microsoft Teams is transforming the calling and meeting experience for individuals and organizations around the world enabling intelligent communications and collaboration in Office 365 environments. AudioCodes' One Voice for Microsoft 365 offering includes products and services that let you plan your Microsoft Teams deployment with confidence, leveraging our market leadership in voice enablement for Microsoft unified communications since 2006.

- Direct Routing SBCs for seamless connectivity with PSTN, SIP trunks and on-premises platforms
- Controlled migration from Skype for Business Server/Online
- Teams-native IP phones and audio/video meeting devices ease user adoption
- Leverage years of experience with Microsoft unified communications

LIVE

MICROSOFT TEAMS DIRECT ROUTING

FOR SERVICE PROVIDERS

Microsoft Teams Direct Routing enables service providers to offer their customers a hassle-free solution for SIP trunk connectivity while enabling coexistence with legacy on-premises platforms. AudioCodes Direct Routing certified Mediant SBCs provide seamless connectivity between Teams and any SIP trunk network. Available as a hardware appliance or as a cloud-native or virtualized software solution, they offer service providers total deployment flexibility – they can be installed as managed on-premises devices or as a cost-effective, virtualized multi-tenant solution in private or public clouds.

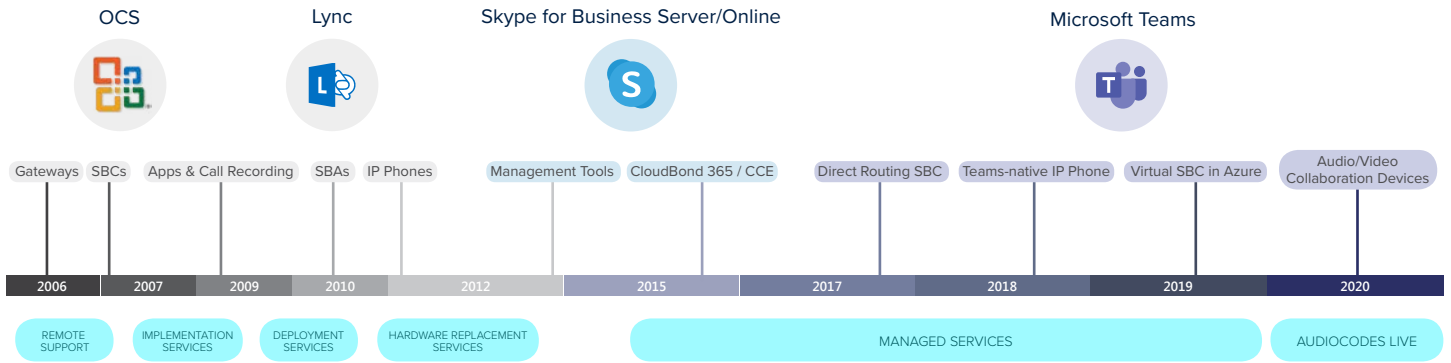

- Flexible, scalable solutions to suit all service provider and customer needs
- Cost-effective multi-tenant support – one SBC instance supports multiple business customers
- Simple management via AudioCodes One Voice Operations Center including tenant self-service management
- User and DID migration achieved without the need for PowerShell scripting
- Automated provisioning of new business customers through integration with service provider's CRM platforms

SKYPE FOR BUSINESS SERVER

AudioCodes offers a wide range of Microsoft-qualified end-to-end voice elements, services and extensive expertise to help implement and enhance **Microsoft Skype for Business voice services**. Whether you wish to maintain full control with a fully on-premises implementation or start migrating to Microsoft Teams, AudioCodes' connectivity appliances, user lifecycle software, end-point devices and management tools will empower you to adopt the architecture of your choice and manage it with a low TCO.
