of the net proceeds of the Company's public offering in June 2020, as well as due to cash provided by operating activities, offset, in part, by the payments of cash dividends during 2020.

"We are pleased to report record financial results for the fourth quarter and full year 2020," said Shabtai Adlersberg, President and Chief Executive Officer of AudioCodes.

"The year 2020 ended on a strong note, underscoring our excellent performance for the full year, and providing continued momentum heading into 2021. With collaboration and work from home trends becoming key for business continuity and workplace productivity in the Covid-19 pandemic era, we have seen increased demand for our comprehensive portfolio of solutions and services for the UCaas and Contact Center markets. Most notable was the more than 17% growth in our Enterprise business during 2020, which now comprises about 78% of revenue, driven mainly by continued success in voice solutions for Microsoft Teams where annual revenue grew by over 300% year-over-year, and more than 30% compared to the third quarter of 2020. Additionally, we witnessed higher than anticipated revenue in the Contact Center business, which grew over 15% in 2020. With continued focus on collaboration tools and on work from home in the coming years, we anticipate similar growth in 2021 and beyond."

Mr. Adlersberg continued, "Given the ramp up in conversational AI opportunities we experienced in the second half of 2020, and looking to the future, we expect voice.ai to be a new growth engine for us over the next several years. In 2020, we experienced over 50% growth in the revenues of our conversational IVR, recording and voice.ai connect solutions. Driven by the current environment and trends, the need for quick and efficient access to contact centers has become a top priority for many. We see rising demand and requirements for automation of customer calls and self-service solutions. Meeting recap is another growth area for us where we integrate an intelligent assistant into our Meeting Insight solution, targeting to automate various enterprise business processes across the organization. As such, we see much potential and growth in voice.ai related applications."

"As we enter 2021 with growth engines such as solutions for Microsoft Teams, contact centers and conversational AI, we are confident in our decision to continue to invest in future solutions and service offerings in the UCaaS and Contact Center enterprise market and to focus on the return on investment to our shareholders," concluded Mr. Adlersberg.

Court Approval of Share Purchases and/or Cash Dividends

In January 2021, the Company received court approval in Israel to purchase up to an aggregate amount of \$30 million of additional ordinary shares. The court approval also permits AudioCodes to declare a dividend of any part of this amount. The approval is valid through July 19, 2021.
