AudioCodes Voice Solutions for Webex Calling

Certified Connectivity for Cloud Connect for Webex Calling and Webex Go

Your Source for Seamless and Reliable UCaaS Voice Communication

As a certified Cloud Connect and Webex Go provider, AudioCodes delivers seamless, reliable PSTN connectivity enabling Webex Calling customers to build a complete, AI-powered business phone system.

AudioCodes provides a range of solutions in addition to the main Webex Calling offering. These include: Webex Local Gateway for Bring Your Own Carrier (BYOC) integration with other voice systems, analog gateways to incorporate legacy analog devices into Webex Calling and global phone numbers via Audiocodes Calling Plans.

AudioCodes solutions for Webex Calling are available via our global network of partners. They are compatible with the following Webex solutions: Webex Calling Multi-Tenant, Webex Calling Dedicated Instance, Webex Wholesale and Webex Contact Center.

AudioCodes Live for Webex Calling

AudioCodes Live is a managed voice solution designed to deliver Webex Calling services with unparalleled simplicity and efficiency.

AudioCodes Live streamlines the deployment, onboarding and management of enterprise voice environments, whether on-premises, in the cloud or hybrid. This not only reduces costs and complexity but also ensures a seamless and efficient experience. With AudioCodes Live, organizations can effortlessly implement Webex Calling, benefiting from a robust, reliable and easy-to-manage voice solution.

Certified Calling Provider

Webex Go

AudioCodes is a Certified Mobile Calling Provider for Webex Go through our Mobile Connect solution, powered by Tango Networks. Mobile Connect enables the seamless integration of mobile devices into your Webex Calling environment upon the quick and easy installation of an eSIM.

- Eliminates the need for frontline workers to carry separate mobile phones for business and personal use.

- Enterprise-grade calling features such as extension dialing, business voicemail and call recording directly from the mobile phone's native dialer

- All calls made over the cellular network, ensuring reliability, corporate data security, regulatory compliance and quality control
