"We continued to expand our business in the Microsoft Lync market segment, posting growth of above 10% over the previous quarter and more than 40% over the-year-ago quarter. Targeting 40% growth for 2014, we now expect this business to become close to 20% of our total Company sales for the year. The launch of AudioCodes One Box 365 has proved to be a success in the first few months of deployment and we believe that the One Box 365 product family will enable further expansion of our Microsoft Lync related business."

"Additionally, we have experienced record sales of our Session Border Controller product line which grew more than 100% over the year-ago quarter and more than 5% over the previous quarter. Our SBC offering continues to lead the Lync space. In the recent quarter our products were selected by one of the leading global hotel chains, a 4000

employee pharma company, and a US government organization. We also enjoyed repeat business from our existing installed base, including from one of the world's largest semiconductors manufacturers," added Mr. Adlersberg.

"To advance growth initiatives, we increased our focus on the design and deployment of higher-value voice networking solutions and services to the enterprise market. Among our fast growing solutions are One Voice for Lync, One Voice Operation center including network management and voice quality performance monitoring servers, and the recently introduced One Box 365. We are confident that this increased focus on solutions and services will enable us to develop new cutting edge business communications solutions and services that will support further long-term revenue growth," concluded Mr. Adlersberg.
