

# Product Notice No. 0175

## New Orderable Accessory Item for Securing Telephony Cable to MediaPack 124 (MP-124)

### Notice Subject:

AudioCodes offers a new orderable accessory item for securing the telephony cable to the MP-124 using a Velcro hook-and-loop cable tie.

### Notice Date:

May 9, 2013.

### Notice Effective Date:

Immediate.

### Affected Products

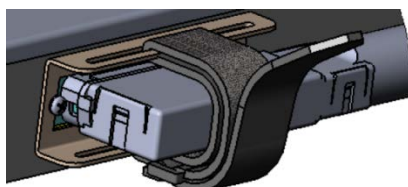

MP-124.

### Notice Details:

The MP-124 interfaces with the analog telephone lines by connecting to a main distribution frame (MDF), using a 50-pin Telco cable, as shown below:

In some installations, customers use Centronics cables that are anchored on one side. For such cable types, AudioCodes now offers an orderable Velcro Strap Kit that can be used to secure the cable to the MP-124 chassis (instead of using the connector latches). The figure below illustrates this Velcro hook-and-loop cable tie:

The Velcro Strap Kit is available as spare parts (separate orderable item) for MP-124, supplied in a pack of 10 units. The Product Number (P/N) is **MP124VELC**.
