- Mediant 1000B SBA

AudioCodes

Notice Details:

AudioCodes has released an updated SBA Management Interface for Microsoft Lync Server.

This updated SBA Management Interface (Version 1.1.12.20) supports the following features:

- Enables/disables the remote Windows PowerShell.
- The AudioCodes SBA device can now be configured to report SNMP information and traps to an external SNMP Trap Manager such as the AudioCodes Element Management System (EMS).
- Support for customer or default security templates, so that the user can now load a security template to the SBA device, or can enable the AudioCodes default hardening templates.
- SBA Cumulative Update wizard support for Microsoft Cumulative Update installer.

Users will now be able to download the new Management Interface file, and apply it to the SBA. For additional information, refer to the *SBA Management Interface Release Notes*.

The SBA Management Interface file and the Release Notes can be downloaded from AudioCodes' website at http://www.audiocodes.com/downloads.
