

GHG Emissions - Annual Data and Reduction Targets

Reporting years: 2023–2024

Last updated: June 2025

GHG Reduction Targets

AudioCodes has defined public long-term GHG reduction targets covering Scope 1, Scope 2, and relevant Scope 3 emissions. These targets support continuous improvement and are reviewed periodically as part of the company's environmental management processes.

- **Scope 1 & Scope 2:** Reduction of **20% by 2035**
- **Relevant Scope 3:** Reduction of **40% by 2035**

Annual GHG Emissions Data (tCO₂e)

Year	Scope 1 (tCO ₂ e)	Scope 2 (tCO ₂ e)	Scope 3 (tCO ₂ e)
2024	62.48	840.15	61,516
2023	45.35	3016.29	62,436

Methodology and Notes

GHG emissions are calculated based on internally collected data and reasonable estimates, using recognized calculation methodologies and emission factors. Scope 3 emissions include relevant value-chain categories considered material to AudioCodes' activities.

Emissions data, particularly Scope 3, is subject to estimation uncertainty and may be updated over time as data quality, methodologies, emission factors, or organizational boundaries evolve.
