

Release of OVOC 8.4.3615 OS Security RPM Patch 4

Product Notice #0601

AudioCodes is pleased to announce the release of OVOC 8.4.3615 OS Security RPM Patch 4. This cumulative patch provides updated Rocky Linux operating-system packages for OVOC deployments running Version 8.4.3615, including updates for vulnerable PHP RPM packages.

Patch 4 can be applied only to an OVOC server running Version 8.4.3615. It can be installed whether or not the previous OVOC 8.4.3615 Security RPM Patch 3 has already been applied.

For the full description of the security update, refer to the “Operating System Security Patch Updates” section in the [OVOC Version 8.4 Release Notes](#).

The patch package is available for download from the approved AudioCodes distribution location at [Download OVOC 8.4.3615 Security RPM Patch 4](#).

The exact RPM list and installation procedure are provided in the README file included in the patch ZIP package.

Main Highlights

- **Security Package Update:** Updated Rocky Linux RPM packages used by OVOC, including vulnerable PHP RPM packages.
- **Cumulative Delivery:** Patch 4 includes the applicable updates from Patch 3.
- **Deployment Scope:** The same patch package is provided for all supported OVOC 8.4.3615 platforms.
- **No OVOC Feature Release:** This is an intermediate security-patch release and does not introduce new OVOC application features.

Important Notes

- Install this patch only on OVOC Version 8.4.3615.
- Patch 4 may be installed with or without Security RPM Patch 3 already present.
- Review the included README and the OVOC Release Notes before installation.
- Follow the documented backup, installation, validation and recovery guidance.
- Customers should maintain access to both the OVOC 8.4.3615 application media and the corresponding Security RPM Patch 4 package.

Recommended Customer Action

Customers running OVOC Version 8.4.3615 should review the updated Release Notes and the README included with the patch, assess the update according to their security-maintenance process, and apply the patch using the documented procedure.
