

# AudioCodes Homeland Security Facility Communications Solution

## Simple, secure prepaid calling for small-to-medium sized homeland security facilities

AudioCodes Homeland Security Facility Communications Solution is a comprehensive turnkey offering that enables inmates to make outgoing calls while ensuring that prison regulations and security requirements are strictly adhered to. The solution combines Peryphon anti-vandalism phone devices and AudioCodes field-proven voice networking components.

Designed to serve the needs of small-to-medium sized correctional facilities and secure units, the solution comes with user authentication, billing and account management, real-time call monitoring and call recording. It also offers flexible connectivity with public telephony networks and other voice platforms.

Robust, anti-vandalism stainless steel phones with display and armed handset

Full control over call duration and permitted called numbers

Programmable, multilingual IVR menus enable caller authentication, checks on remaining balance and time available

Reliable and secure integration with public telephony networks

Real-time call monitoring with high-quality recording and playback (optional)
