Release of OVOC 8.4.3615 OS Security RPM Patch 5

Product Notice #0604

AudioCodes is pleased to announce the release of OVOC 8.4.3615 OS Security Patch #5. This cumulative security patch contains 439 RPM packages and is intended for OVOC servers running Version 8.4.3615.

OS Security Patch #5 can be applied only to the latest OVOC 8.4.3615 GA release. It may be installed whether or not any previous OVOC 8.4.3615 security patches have already been applied, because Patch #5 includes Security Patches #1 through #4.

For the full description of the security update, refer to the "Operating System Security Patch Updates" section in the OVOC Version 8.4 Release Notes.

The patch package is available for download from the approved AudioCodes distribution location at Download OVOC 8.4.3615 OS Security Patch #5.

The exact RPM list and the complete installation procedure are provided in the README file included in the patch ZIP package. A server reboot is required after installation because the patch includes kernel RPM updates.

Main Highlights

- **Security Package Update:** Cumulative OVOC operating-system security update containing 439 RPM packages.
- **Cumulative Delivery:** OS Security Patch #5 includes Security Patches #1 through #4; earlier patches do not need to be installed first.
- **Deployment Scope:** The Patch #5 package is available for all OVOC 8.4.3615 platforms.
- **Reboot Required:** The OVOC server must be rebooted after the patch installation completes due to kernel RPM updates.

Important Notes

- Install OS Security Patch #5 only on the latest OVOC 8.4.3615 GA release.
- Patch #5 may be installed with or without earlier OVOC 8.4.3615 security patches already present.
- Review the included README and the "Operating System Security Patch Updates" section in the OVOC Version 8.4 Release Notes before installation.
- Follow the installation procedure in the README file and reboot the server after the update completes.
- The update script verifies that the installed OVOC version is exactly 8.4.3615 and stops without making changes if the version does not match.

Recommended Customer Action

Customers running the latest OVOC 8.4.3615 GA release should review the updated Release Notes and the README included in the Patch #5 package, then apply the patch using the documented installation procedure. Reboot the OVOC server after the installation completes.
