

AudioCodes RXV200 Android Intelligent AV Hub

Intelligent Android
AV hub

Delivers AI-enhanced video
and meeting summaries

Flexible device bundles to suit
any meeting room

Allows easy future upgrade
of A/V devices

Dual screen support

Centralized device
management and monitoring

Modern meeting solutions must be adaptable enough to accommodate any room size or shape, while minimizing the number of table-mounted accessories and devices and ensuring a high-quality experience for all participants wherever they are located. With this in mind, AudioCodes has developed the RXV200 Android Intelligent A/V hub and compute unit.

The RXV200 connects and orchestrates between multiple audio and video peripherals, including support for dual screens, and delivers AI-enhanced video streaming and meeting summaries, powered by its advanced Qualcomm processor.

The RXV200 provides full integration with AudioCodes meeting room devices, as well as 3rd-party AV equipment for customers who wish to retain their existing AV devices or integrate professional 3rd party AV equipment into their Teams meeting rooms.

Simple Control and Management

The RXV200 can be controlled within the meeting room via the AudioCodes RX-PAD touchscreen Android room controller. IT professionals can remotely manage and monitor the device using the AudioCodes Device Manager tool.
