

Quick Guide

1. Introduction

This guide describes how to pair your AudioCodes RX-PAD Meeting Room Controller with your Microsoft Teams Room on Android (MTRA) (RXV81 or RXV200).

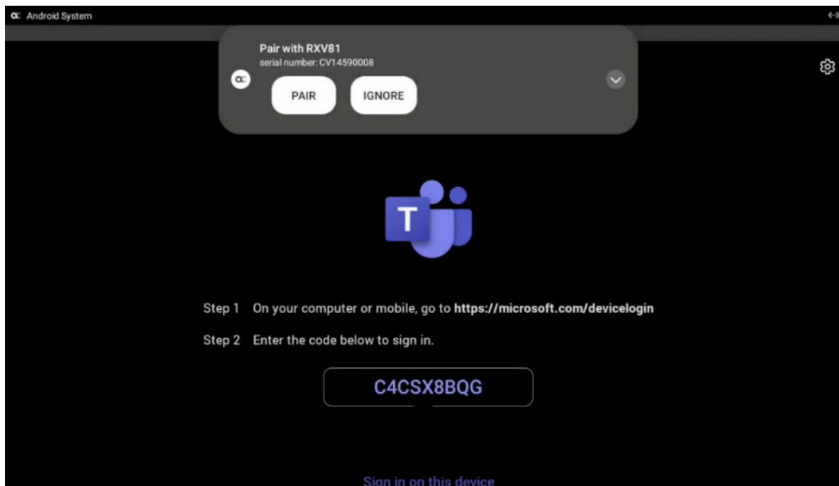

2. Pairing Prerequisites

- ✓ Make sure both devices are running the latest AudioCodes firmware version. This version should support AOSP Device Management (click [here](#) for details).
- ✓ Make sure both devices are connected to the same network (subnet).
- ✓ Make sure that UDP port 9999 is open in both directions inside the network.
- ✓ For Wi-Fi connectivity, you must use a power supply adapter (not supplied but can be ordered separately).
- ✓ Make sure that the distance between the pairing devices is close enough for uninterrupted Bluetooth connectivity.

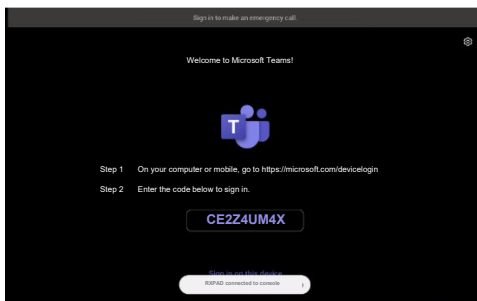

3. Pairing Procedure

The following procedure describes how to pair RX-PAD with the MTRA.

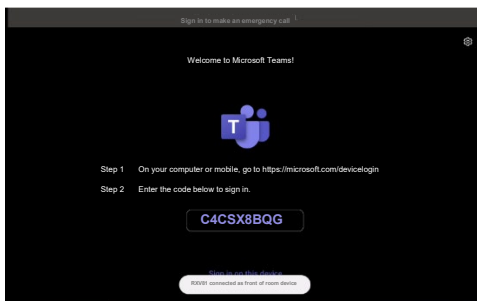

1. Connect the RX-PAD and MTRA to the network; the pairing process automatically begins.

2. On RX-PAD, click **PAIR** (see above figure) for the specific device (according to serial number) that you want to pair with RX-PAD.
3. Once pairing is complete, RX-PAD displays the following message:

MTRA

RX-PAD

4. Signing into Microsoft Teams Account

Starting from July 1, 2023, only users with the *Teams Rooms Basic* or *Teams Rooms Pro* licenses can sign into MTRAs. Absence of such a license will cause a sign-in failure.

The following procedure describes how to sign into your Microsoft account. You need to do this on both RX-PAD and the MTRA.

1. If the resource account doesn't exist yet, create it. For details, refer to [the Microsoft instructions for creating a Teams Room resource account](#).
2. Go to <https://microsoft.com/devicelogin>; the following appears:

3. Enter the code that is displayed on the paired RX-PAD and MTRA (e.g., "C4Y8MK2P3"), and then click **Next**.
4. Follow the on-screen instructions to sign into your Microsoft account, and then close your web browser.

When setup is complete (may take several minutes), the home page is displayed:

MTRA

RX-PAD
