

# AudioCodes Intelligent Meeting Room

## AI Summary

### Focus on the Meeting, Not on Note Taking

An essential component of the AudioCodes Intelligent Meeting Room offering, AI Summary uses generative AI to automatically create and share meeting summaries among meeting participants and beyond. This enables in-room participants to focus their attention on the ongoing discussions rather than on manual note taking.

AI Summary is enabled through a bot developed by AudioCodes (powered by our award-winning Meeting Insights technology), and allows all users within an organization to benefit from automatic meeting recaps without the need for activating a personal meeting assistant.

#### Never Miss a Thing

Automatically create and distribute online meeting summaries

#### Democratize AI

Add AI capabilities to any room equipped with an AudioCodes MTR device

#### License by Room

A cost-effective alternative to individually licensed personal AI assistants

#### Protect Privacy

All meeting data automatically deleted from AudioCodes cloud after processing

## Save Time and Increase Efficiency

When added to the meeting the AI Summary bot analyzes meeting discussions and content and produces a detailed summary that is automatically emailed to participants immediately after the meeting.

## Focus on Ongoing Discussions

AI Summary frees up participants to remain focused on the ongoing discussions by automating the process of note taking, summarization and distributing the meeting recap.

## Pave the Way for Advanced AI Meeting Analytics

Still weighing up your options with regard to how many AI licenses you need in your organization? AI Summary allows you to introduce the technology gradually while you assess its benefits for your organization as a whole.

## Simple Activation

The AI Summary bot can be easily added to a meeting using the room's meeting controller, eliminating the need for dedicated software installation. The solution is enabled through a simple, one-time registration process via the AudioCodes Live Platform.

## Security and Privacy

All meeting content and recordings are protected by strict privacy regulations and are deleted as soon as the summary has been distributed, ensuring that participants' data privacy is protected.

## Supported Products

**RXV200**  
Intelligent AV Hub
